BELGUERMI Mustapha

an NETWORK SECURITY ADMINISTRATOR / CTF player /
NETWORKING - CYBER SECURITY specialist

Algiers, Algiers, Algeria

Summary

Results-driven Network and Cybersecurity Engineer, holder of a Higher Technician Diploma (top of the class, 18/20). Specialized in intelligent network infrastructures, AI-based self-healing systems, and cybersecurity automation. Hands-on experience designing comprehensive monitoring solutions, enterprise network architectures, high-availability load balancers, and VoIP systems. Completed a professional internship within the IT Security department of Algérie Télécom. Proven skills demonstrated under competitive conditions in national hackathons and the WorldSkills competition. and i would like to learn more and get more experience while i can be useful at a job.

Experience

WorldSkills Algérie

world skills - competition

April 2026 - Present (5 months)

Represented my institute in a skills competition focused on enterprise network infrastructure and system administration. Configured and presented complete network architectures including routing, switching, VPN, Active Directory, and server management.

Cybears®

Hackathon de cybersécurité

December 2025 - Present (9 months)

Participated in a national cybersecurity competition featuring offensive and defensive CTF-style challenges. Applied skills in penetration testing, digital forensics, log analysis, and vulnerability exploitation under competitive conditions.

Algérie Télécom

Trainee — IT Security Training Program (6 months)

October 2025 - March 2026 (6 months)

Completed a 6-month practical training program in the IT Security department, participating in firewall management, network traffic analysis, vulnerability assessment, incident response, and production server security hardening.
